

Good Afternoon,

I am writing about the aforementioned bills that I am completely AGAINST.

Mandatory vaccination for a sexually transmitted disease is horrific. Only I know my child and should be the one to make the decision about my child's participation in this type of vaccination. Also, some children are medically fragile and have other individualized medical conditions like autoimmune issues that make vaccines problematic. I am not against all vaccines. I am for an individualized approach to administer vaccines. The science exists, it is just not used. And as far as the HPV vaccine, there are concerns about its safety and long term protection. Girls have died from this vaccine and also become infertile. Testing on this vaccine has been inadequate.

SB 858 and SB 94 remove parental consent. This is SO wrong. It is so scary that this HPV vaccine is the one thing the state government would choose to remove parental consent.

Basically the HPV vaccine makes a lot of money for the pharma companies. Vaccine companies are the only industry that cannot be sued so the government created a Vaccine Injury Fund. This fund has paid out millions of dollars. I urge you to watch the documentary "The Truth About Vaccines".

Again, I OPPOSE HB 7199, SB 858 and SB 94.

If you have any questions, please call me at 203-858-2546.

Regards,
Lisa Williams
